MITIGATION RATE NOTES

The mitigation rates above are average “billing levels” *per hour*, and are typical for the incident responses listed, however, when a claim is submitted, it will be itemized and based on the actual services provided.

These average mitigation rates were determined by itemizing costs for a typical run (*from the time a fire apparatus leaves the station until it returns to the station*) and are based on the actual costs, using amortized schedules for apparatus (*including useful life, equipment, repairs, and maintenance*) and labor rates (*an average department’s “actual personnel expense” and not just a firefighter’s basic wage*). The actual personnel expense includes costs such as wages, retirement, benefits, workers comp, insurance, etc.
